Impression of large open, windy, cool area with water nearby.  
"large flat hard surface area "like" airtiled sort of place. Structures  
nearby; one is metal tall, w/ angles in it. Other bldgs nearby,  
one of interest. Inside it's dark, light, cool, warm, and has at  
least one room that is lighted, has a "filing thing" in it &  
a surface that is "like" a desk or table for spreading things  
out on which has paper on it right now.

54 1/2 impression that "things" come in from direction & be changed into more useable form - not fundamentally altered, just made "better" for purpose. "Like" analog signal coming in, being digitized, then being sent on in a more transmittable, accurate format.

Sense of linking or connection or being connected over wide area involves numerous different "outposts" with people. Like a "network"

4/2 "Document" doesn't seem to belong to whom it used to. 2<sup>nd</sup> party from has it. Seems almost ~~as~~ ~~was~~ a report of something that was being or is being done/produced elsewhere. Elsewhere is somewhere along ways over our body of water & land. "1104" almost on the other side of the globe in a relatively hard to access place. It's almost as if someone has saved some sort of coup by having this document/information in their possession.
